This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

+ *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.

+ *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.

+ *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.

+ *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. You can search through the full text of this book on the web at `http://books.google.com/`

NOTES.

Physicians should remember that the notation of the potencies, is no guide to their administration : that can only be obtained by experience for as Hahnemann says, "*there can be no standard for measuring the degree of dynamic potency of a medicine, except the degree of the reaction of the vital force against it.*"

In order that all should have the benefit of high potencies, the plan of sending grafts has been adopted ; if a graft is put in a vial of any size. and the vial filled with unmedicated pellets and corked the whole mass will be medicated in half an hour.

The price of grafts is :

For C. M. Potency and under - - - -	1cc. each.
For all over C. M. - - - - - -	2oc. each.

Those who prefer to have the remedies in vials, the price will be :

For Pellets in Vial	No. 1548.	Half oz.	1 oz.
50 M. and under - -	$ .25	$ .40	$ .50
C. M. " to 50 M. -	35	50	70
All above C. M. - -	1.00	1.25	1.50

Dilutions Double Rates.

The potencies in stock are the 1 M., 10 M., 50 M., C. M., M. M.' C. M. M., D. M. M. and few much higher—and none lower than the M— Physicians wanting other potencies, must wait till they can be prepared.

Sent by Mail or Express pre-paid, on receipt of the order, enclosing Post Office order for the amount of the bill.

When a vial of medicine is nearly emptied, fill it with medicated pellets, and you will not have to purchase the remedy a second time.

As was stated in 1876, the following generalization, having been confirmed by myself and many other physicians, is now repeated, with a variation, resulting from experience.

Morbific matter will cure the disease which produced it, if given in a high potency, even to the person from whom it was obtained.

Some persons think there is danger of innoculating a patient with the disease, but this is all theory, and not a single case has been reported. If the disease is latent in the system, the potentized product may bring it to the surface, as was the case in the great proving of Variolinum, but in that
